

M.G. Car Club Y Type Register

Registrar's Report to the A.G.M. held on 30th March 214

During the past year, we have gained information on a number of cars that were previously unknown to the Register. We now hold information on a total of 1,151 'live' cars worldwide an increase of 36 on last years figures. The total number of cars on record amounts to 1,876 and we can confirm that of this number, 162 are regarded as being 'dead'. The remaining 563 cars are hopefully resting, awaiting discovery and are currently unclassified. Who knows?

Newcomers are spread around the world with the greatest 'new' contingent appearing in England, where 16 previously unknown survivors have been uncovered this year. As you can identify from the attached table, 7 of these are YAs, 5 are YBs and 4 are YTs

The accuracy of the information we hold is not always consistent with the current status of individual vehicles. It is possible that, over the period since the Register was formed, some of the cars listed as "live" may no longer be so. On our database, cars are given a "live" designation where information has been received since 1991 when the Register gained its independence from the T Register. "Live" does not necessarily mean that the car is roadworthy. It may be awaiting or undergoing restoration.

The number of owners who are willing to take part in our "Get You Home Scheme" has reduced this year as a number of previous owners have sold their cars. The number currently participating stands at 88. The latest list was sent out at the end of January, along with an entry form for our Spring Run. We also included a request for owners to visit our website and inform us of any changes in ownership.

In the formative days of the Register, I was tasked to compile a photographic record of cars around the world and I have maintained this record ever since. I currently have images of 873 cars worldwide.
